

Campus Café ft. Audentis: Lighting up your future with integrated photonics

06-12-2023 | 15:30

What do a phone, a TV, and a camera have in common?

They're all useless without photonics. This technology is hiding in plain sight in more places than we think - and that will only increase in the near future. It's safe to say that life as we know it is shaped by photonics, but what will the future hold? How will photonics impact our world even more?

Together with experts, we'll dive into photonics' influence on fields such as medtech, chiptech, quantum computing and more during Campus Café on December 6th.
